

Final Project Report Outline

Software Project Design and Development Lab

1. Cover Page

- **Project Title**
- **Team Members** (Name & Student ID)
- **Course Name & Code**
- **Instructor Name**
- **Submission Date**

2. Abstract

- Brief summary of the project (150–250 words)
- Problem statement, approach taken, and key outcomes

3. Table of Contents

4. Introduction

- Background and motivation
- Problem definition
- Project objectives and goals
- Scope and limitations

5. Requirements Analysis

- Functional requirements
- Non-functional requirements (performance, security, usability, etc.)
- Use case diagrams / user stories

6. System Design

- System architecture overview
- Class diagram Design
- Database design (ER diagram / schema)
- UI/UX design (wireframes or mockups)
- Technology stack with justification

7. Implementation

- Development methodology (Agile, Scrum, Waterfall, etc.)
- Module/feature breakdown
- Challenges faced and how they were resolved
- Screenshots of the working system

8. Project Management

- Team roles and responsibilities
- Work breakdown structure (WBS)
- Timeline / Gantt chart
- Version control practices (Git workflow, branching strategy) if any

9. Results and Discussion

- Estimated Budget Breakdown
- Features successfully implemented
- Performance evaluation
- Comparison with initial objectives
- Lessons learned

10. Conclusion and Future Work

- Summary of the project
- Unfinished or planned features
- Recommendations for future improvements

11. References

- All tools, libraries, papers, and resources cited (IEEE or APA format)

Note: You can edit or add sections/subsections based on your report requirements. Must add relevant diagrams where necessary.
